Brand guidelines

EDUCATE - INNOVATE - TRANSFORM

1. The logo

The logo is a glowing infinity loop, wired to neurons, above the word INFINITE-AI. It was supplied as one square artwork on a deep-space background. Use the file as supplied: `icons/profile_logo_square_1080.png`.

Do

- Place it on Deep Space, Midnight, or a dark photo.
- On white paper, keep it inside its rounded dark square, as on the letterhead.
- Keep clear space of at least one tenth of its width on every side.
- Keep it at or above 24 mm in print, or 90 px on screen.

Do not

- Stretch, rotate, recolour or add effects.
- Put it straight onto white, or onto a busy or bright background.
- Redraw it, or rebuild the wordmark in another typeface.
- Use it smaller than the minimum size.

2. Tagline

EDUCATE - INNOVATE - TRANSFORM

Written in capitals, in this order, with spaces and hyphens as shown. Set in Space Grotesk bold with wide letter-spacing, or as a Cyan to Violet gradient on dark.

3. Colour

Deep Space
`#05070F`
`RGB 5, 7, 15`
`CMYK 67, 53, 0, 94`
Backgrounds, dark mode

Midnight
`#0C1224`
`RGB 12, 18, 36`
`CMYK 67, 50, 0, 86`
Panels and cards

Plasma Cyan
`#5BC8EC`
`RGB 91, 200, 236`
`CMYK 61, 15, 0, 7`
Primary accent, links on dark

Neural Violet
`#8D6CFF`
`RGB 141, 108, 255`
`CMYK 45, 58, 0, 0`
Secondary accent

Spark Gold
`#F5B841`
`RGB 245, 184, 65`
`CMYK 0, 25, 73, 4`
Highlights and warnings, used sparingly

Ice White
`#E9F6FF`
`RGB 233, 246, 255`
`CMYK 9, 4, 0, 0`
Text on dark

Ink

Cyan on light

#12162A
RGB 18, 22, 42
CMYK 57, 48, 0, 84
Text on light

#0A6F8F
RGB 10, 111, 143
CMYK 93, 22, 0, 44
Accent text on white paper

Violet on light
#4F34D2
RGB 79, 52, 210
CMYK 62, 75, 0, 18
Accent text on white paper

CMYK values are simple conversions for reference. Ask your printer for a proof and match by eye; do not rely on the numbers alone. On light backgrounds use the three light-paper colours; the bright accents do not have enough contrast on white.

4. Typography

Use	Typeface	Notes
Headings, tagline	**Space Grotesk**	Bold for headings, wide spacing for the tagline.
Body text	Inter	Regular and semibold. Arial is the fallback in email.
Labels, codes, contact lines	Space Mono	Small, muted.

5. Founder photograph

Sarah-Jane Harding, Founder
Always circular, with a Plasma Cyan ring. The supplied photo is 360 × 360 px, so use it at 360 px or smaller. A larger copy needs a higher-resolution original. Only the founder and consenting staff appear in brand material. Never use a learner or a child's image.

6. Contact block

Infinite-AI
10 Jellicoe Street, Pinetown
KwaZulu-Natal, 3610, South Africa
+27 611 939 620
infinite-ai-ecosystem@protonmail.com

Use exactly this wording. The province is written with the official spelling, KwaZulu-Natal.

7. Voice

- Plain, warm, exact. Say what the product does, not what it might one day do.
- No invented numbers, no invented testimonials, no learner details.
- AI drafts. The teacher decides. Always.
- Written for South African schools: South African English, rand amounts, local context.

9. Where the brand lives in the software

The platform reads one file, `src/brand.ts`, for the name, tagline, address, phone, email, colours and logo. Documents exported from the platform carry the tagline and contact footer. Change the details in that one file and rebuild.
